Quarantine Guidelines for Household Close Contacts

Individuals with a sibling or household member who tests positive must remain at home for a **minimum of 10 days** following the date of the household member’s positive test. These individuals are not eligible for modified quarantine, unless they are exempt from quarantine due to vaccination status or recent infection.

Household close contacts must stay at home for the duration of the positive household member’s isolation period. Close contacts then begin their official quarantine period (Day 1) on the date that the positive individual is cleared to return to school or work (Day 6, with a negative rapid antigen test result on Day 5, or Day 11, if the positive individual does not test or tests positive on Day 5). See diagram below.

Positive Case	 Date positive test was taken					 -Test Eligible-	 Eligible to return with a negative antigen test						
Close Contact	Close Contact must quarantine at home for the duration of positive household member’s isolation period						 Quarantine “clock” begins				 -Test Eligible-	 Eligible to return with a negative test

Close contacts should test on or around Day 5 of their official quarantine period (Day 10 after the positive individual’s positive test date), to return to school or work on Day 6 with a negative result.

Positive household members must consistently wear an upgraded, surgical-style mask at home for a full 10 days following the date of their positive test, even if they are allowed to return to school or work on Day 6. If this condition cannot be met, the household close contact must delay the start of their official quarantine until Day 11 (11 days after the date of the positive test becomes Day 1 of quarantine).
